### | NANO VISION

**Say welcome to the new way to repel rain on your windshield without compromise: NanoVison**

NanoVision has a long lasting protection (up to 6 months) allowing a very good water repellent effect on windshield that also helps you taking bugs away easily! The shinny and transparency of glass surfaces will also be preserved longer. At dark, it will provides you a better vision and unlike other popular windshield treatment it will not create a film on it. Your windshield will be 100% translucent at all time.

In cold weather, frozen window will be cleared more easily preventing the risk of scratches. On everyday use, road dirt on windshield is significantly reduced thereby reducing the use of windshield washer and wiper continuously.

If the effect started to diminish, the surface can easily be re-sealed. Simply reapply like the first time! Unlike other popular sealants, when reapplied, Nanovision will not create any built up or film. It will create the original nano protective layer with a thickness of about 1/10 000 of human hair (about 3 microns). Treated surfaces can be clean with any regular soft cleaning products.

### | NANO QUARTZ

**NanoQuartz, the "Do-It-Your-Self" professional treatment.**

No more wax needed! NanoQuartz coating is very user friendly and funny to apply. The water repellent effect is really great and helps keeping your car clean in everyday use.

Easier and better it will also last longer! Unlike wax that stay on your car for a maximum of 6 months, NanoQuartz last up to 24 months. This product is very versatile and like many other NanoProtex products, it can be applied on any paint or unpainted surface.

## FOR YOUR EVERYDAY NEEDS

### | QUICK DETAILER

**QuickDetailer, THE way to replace old regular quick-waxes.**

Easy and quick to apply, it can be applied everywhere on your car even on unpainted surface, moldings, glass, wheels and much more.

By using nanoparticle, It will provides you a high end glossy finish and a protection up to 8 months.

### | NANO MAG

**Don't be fooled, keep you wheels nice and clean with NanoMag.**

The wheels are at ground level; micro particles of asphalt, tar and dirt of all kinds can easily stick on your wheels and damage them. Also, during braking, large amounts of metallic particle from brake pads are directly in contact with your wheels. With an extreme heat emerges from those one, brake dust will goes directly on wheels coating and start to contaminate them. NanoMag is the best coating available on the market to prevent from those bad everyday situation.

### | NANO LEATHER

**Your needs for your luxury leather: NanoLeather**

Like any other leather, seat and furnish of you car need to be treated to stay nice and fresh. Without protection, leather car seats tend to crack over time especially the driver's seat that is strained. The nanoparticles of our NanoLeather penetrates the leather to offer you a long time protection. Accidental spill liquids on the leather will be no longer a problem! Our treatment prevents liquid from entering the leather. It will also create a truly effective protection against UV that remains the main factor of fading leather.

### | TEXTILE SEALANT

**Give your textile the protection they need: Textile Sealant**

Fading color, stains on yours fabrics and cleaning difficulty? Your textile will never be the same with Nanoprotex Textile Sealant. It will protect against penetration of U.V. rays in your fabrics that cause fading. In the same time, by isolating each fiber with our nanoparticles, a high hydrophobic effect will be created. This feature will prevent against the possibility of stain and will keep clean your textile.

As a long lasting protection, our Nano Textile Sealant is the way to protect removable soft-tops, seats, fabric interior trims and much mores.

### | NANO TITANIUM

**NanoTitanium, for those professional that want something better and quicker.**

The NanoTitanium create a coating of hard and compact nanotechnology base that will act as a protective film. It will increase the shine of your vehicle while providing an excellent protection against everyday contamination and dust. By increasing your clear coat hardness twice as normally (\*4-5H to 9H), our Nano Titanium will provides a better resistance to minor scratches like common swirl created by everyday washing.

Can be applied on any surface of your car for a maximum protection up to 24 months.

### | NANO GLASS

**Introducing the ultimate professional paint treatment: NanoGlass.**

“Professional installation required”

The NanoGlass has been created specially to satisfy the pickiest customers. In addition to its high water-repellent effect, this nanotechnology sealant as also an excellent durability and antifouling proprieties. To reach its maximum efficiency, NanoGlass must be professionally applied respecting all application instructions. Last up to 30 months on any painted or unpainted surface of your car.
